

Plastic Fixed Grille Vent

HGV4, HGV5, HGV6 & HGV8

The HGV range is for wall or eave mounting and can be used as an outlet or fresh air intake vent. The Fixed Grille vent can be used as either a through the wall application or an under the eave application.

The Fixed Grille is made of UV resistant polypropylene plastic to withstand the Australian climate. The Grille comes with a flyscreen mesh, protecting your home from pests.

Key Benefits

- Rounded edges with mounting holes in each corner
- Includes a fly-screen mesh
- 25mm deep rear spigot for ducting attachment
- Suitable for through the wall and under the eave ventilation
