

Plastic Fixed Louvre Vent

HSM4WR, HSM5WR & HSM6WR

The HSM vent range has vertical grilles between the Louvres, whilst the 125mm and 150mm vents have a 12mm mesh on their rear spigots to prevent pests and vermin from entering the system. The fixed Louvres can be used as an outlet or intake vent.

The Fixed Louvre Vent is made of UV resistant polypropylene plastic to withstand the Australian climate.

Key Benefits

- Rounded edges with mounting holes in each corner
- 25mm deep rear spigot for ducting attachment
- Suitable for through the wall ventilation only

Dimensions (mm)

Model No.	A	B	C	D
